MagVision

MagVision is a development from the classic board Vision. The difference is that the MagVision adds one quality; the magnetic surface. This increases the usability even more.

Magnetic glass board of 4 mm tempered clear float glass with frosted edges with back in rolled, white porcelain that is burnt into the glass during tempering process. The board is optic white as standard, other colours are available per request.

The board hangs 32 mm from the wall on wooden rails that are fixed to the wall and it is secured with locking screws. The plated brackets on the back of the board are fixed so that you can hang the board horizontally or vertically (except board size: 1980 x 1000 mm / 1980 x 1200 mm).

MAGVISION MAGNETIC GLASS BOARD

Description	Art no	W x H mm	Weight
