

Automatic Vertical Screen (AVS)

The Automatic Vertical Screen (AVS) offers the unique ability to recess the screen case into the floor for a decorative enclosure

Automatic Vertical Screen (AVS)

The Automatic Vertical Screen offers the unique ability to recess the screen case into the floor for a decorative enclosure. A specially designed scissor system raises the screen to its fullest extension. The unique trap door system opens prior to the screen's ascent, and closes after the screen descends. The AVS is available in front projection models only.

The AVS is available with a variety of Stewart's front projection materials. Our exclusive Tab-Guy™ tensioning system ensures a smooth and completely flat screen surface. Matte black over-scan borders provides a perfectly masked image area. Microperf X2 option is available when acoustic transparency is required.

SPECIFICATIONS:

Electronically controlled screen system with trapdoor	Included
Aluminum & Sintra housing/case	Included
3-1/4" roller tube with insulated drive	Included
Tab-Guy™ tensioning system	Included

Specifications are subject to change at anytime without notice.

Dimensions above include 4" black drop - over scan border may vary by size.

*CRITICAL: It is extremely important to add only the amount of black drop needed on any Stewart retractable screen model to ensure a smooth and flat image.
