

Horizontal ElectriScreen ElectriMask

Retractable variable masking screen designed to provide you with a perfect image area when viewing various aspect ratios

Horizontal ElectriScreen ElectriMask

The Horizontal Electriscreen Electrimask is a retractable variable masking screen designed to provide you with a perfect image area when viewing various aspect ratios. Electronically controlled screen system and masking panel extend and retract to eliminate unsightly gray bars or image cropping. This contemporary screen model is great for use in a home theater, boardroom, or any other location a projection screen is to be utilized.

The Horizontal Electriscreen Electrimask is available with variety of Stewart's front or rear projection materials. Our exclusive Tab-Guy™ tensioning system ensures a smooth and completely flat screen surface. Matte black over-scan borders* provide a perfectly masked image area.

Microperf X2 and Cinemaperf are available when acoustic transparency is required (acoustically transparent panels also available upon request).
