

The Oasis

Create exciting, one-of-a-kind outdoor entertainment centers with this weather-resistant retractable screen

The Oasis

Do you love being outdoors on your spacious patio? Maybe you have an amazing view of the mountains or live right along the shore. Ever wonder how you can entertain your friends and family outside during SuperBowl Sunday or watch a movie while feeling the refreshing ocean breeze?

Who better than Stewart, leaders in projection screen technology, to come up with the perfect entertainment solution that addresses the growing trend in outdoor living? Stewart's weather-resistant Oasis is capable of creating an exciting, upscale outdoor living space.

The Oasis screen is an electronically controlled retractable screen based on the company's popular Luxus Model A Electriscreen (LX/LXC Models). However, the Oasis is designed specifically for outdoor use and is resistant to corrosion and other outdoor elements.

Like all Stewart screens, the Oasis can be custom manufactured for a client's specific requirements including screen size and aspect ratio. The screen housing is available in black or white, and any of Stewart's front or rear projection materials may be used.

SPECIFICATIONS:
