

VistaScope

Vertical masking panels allow for full enjoyment when viewing movies in super widescreen formats

VistaScope

The VistaScope, a member of the Stewart's Variable Masking screen line, features a native 2.40:1 image area allowing for full enjoyment when viewing movies in super widescreen formats. Vertical masking panels glide in from the left and right side providing multi-aspect ratio capabilities. This unique fixed frame, variable masking screen assists in eliminating unsightly black bars from the viewing area to provide you with a picture perfect image.

Optimize your VistaScope with Stewart's award-winning front or rear projection materials. Microperf X2 is available when acoustic transparency is required (acoustically transparent panels also available upon request).

Stewart's exclusive VeLux™ black-velvet appliqué gives the VistaScope a luxurious look and feel. This specialized frame finish absorbs possible over-scan while boosting perceived contrast.

SPECIFICATIONS

Aluminum extrusion framing system	Included
Electronically controlled vertical masking panels	Included
Specialized snap-fastening system	Included
VeLux™ appliqué finish	Included

MATERIAL

Front projection material	Included
Rear projection material	Optional

PERFORATIONS

Microperf X2 THX Ultra	Optional
